

FREEZE: DON'T FEEL THE COLD

When you live on the mountains and the glaciers, staying warm is a matter of survival.

That is why for hundreds of years Austrians have been perfecting the art of making the best cold-weather clothing in the world.

Using only local mountain sheep's wool and pure boiling hot water, we are able to make garments without chemicals or synthetics that outperform modern gear in the cold and are made to last a lifetime.

ALL NATURAL 100% WOOL
MITTENS, CAPS, SOCKS
AND MORE FROM THE
MOUNTAINS OF AUSTRIA

HEAD TO TOE

When you need to protect your extremities and keep in body heat, we've got you covered. Shop our full line of 100% wool caps, mittens, socks and much more for everything you need to stay warm.

OUR PROCESS

It all starts in the mountains of Austria, with several extra layers of 100% wool yarn spun into a thick weave. Once the garment is knit into shape, it is finished by boiling until it shrinks down to become dense and solid unlike anything you've ever seen.

FEATURES

HEAVY DUTY

Natural fibers are tough and built to last. Plastics and synthetics crack under pressure while our extra thick weave of 100% wool maintains its strength and flexibility in extreme cold.

COMFORT

Wool is the best material to regulate your body temperature. It traps your own body heat to keep you warm while naturally breathing and absorbing moisture so you're never wet.

STAYS CLEAN

If you've ever worn wool, you know that it stays fresh longer than any other fabric. Wool has built-in natural odor resistance so that it can be worn often and for long periods of time without issue.

EASY MAINTENANCE

Let any garment soak in lukewarm water with our no-rinse wool wash for 15 minutes and you're done! Just lay them out flat to air dry and your woolen will be as good as new.
